the study of paleocurrents since 1963 is now a very routine part of sedimentology and more and more such studies are finding use in other fields thus it seemed appropriate for us to review post 1963 developments and present them in a compact manner for the interested reader instead of rewriting a second edition which thirteen years later we would organize in a completely different way we have brought each chapter up to date with new material up to 1976 a new update supplement has in this edition been inserted after each one of the original chapters we have stayed close to the original theme of paleocurrents how to measure them and how

to use them to solve geological problems ranging in scale from the hand specimen to the sedimentary basin and beyond we have used many annotated references and tables to help present this information to the reader the reader will note that we have cited a few 1962 references publications that appeared too late to be cited in the original 1963 edition a few times we have also cited a reference which was included in the first edition these are marked with an asterisk and hence do not appear in the new lists of references we have been aided by many in cincinnati wanda osborne and jean carrol did typing and richard spohn the university s geological librarian was very helpful in obtaining many references to the literature

in this book the first of a series robin d gill author of the highly acclaimed rise ye sea slugs and cherry blossom epiphany the largest single theme anthologies of poetry ever published explores the traditional japanese new year through 2 000 translated haiku mostly 17 20c the new year r h blyth once wrote is a season by itself that was nowhere so plain as in the world of haiku where saijiki large collections called of ku illustrating

hundreds if not thousands of briefly explained seasonal themes generally comprised five volumes one for each season yet the great doyen of haiku gave this fifth season considered the first season when it came at the head of the spring rather than in mid winter only a tenth of the pages he gave to each of the other four seasons 20 vs 200 was blyth zen enthusiast not enamored with ritual or was he loath to translate the new year with its many cultural idiosyncrasies most common to the sinosphere but not to the west because he did not want to have to explain the haiku it is hard to say but with these poems for the re creation of the world robin d gill aka keigu respect foolishness or respect fool rushes in where even blyth feared to tread to give this supernatural or cosmological season one that combines aspects of the solstice christmas new year s easter july 4th and the once upon a time of fairy tales the attention it deserves with g k chesterton s words evoking the mind of the haiku poets of old the author publisher leaves further description

of the content to his reader reviewers the man standing in his own kitchen garden with the fairyland opening at the gate is the man with large ideas his mind creates distance the motor car stupidly destroys it g k chesterton heretics 1905
